

Ready to transform your customer care?

THE LEADING CUSTOMER CARE PLATFORM FOR PRINCIPAL CONTRACTORS

“clixifix® was implemented within days, making for a seamless transition. The user-friendly system provides real-time updates for clients, streamlines sub-contractor management, and centralizes key documents like site drawings, meter readings, and manuals. The reporting feature offers clear insights into KPI performance, replacing outdated spreadsheets and improving efficiency.”

Hale Principal Contractors

We are simplifying customer care. Are you ready to join us?

clixifix® is transforming customer care in the construction industry. Our award winning defect management software strengthens collaboration between your clients and your supply chain of contractors, as well as saving time and money.

Today, clixifix® is trusted by many Principal Contractors who are now able to remain compliant and improve customer satisfaction, whilst delivering customer care excellence.

James Farrell, Co-Founder and CEO

The Problem

Many house builders are struggling to manage post-completion defects manually on their new build portfolio. Relying on spreadsheets, emails, and phone calls - or attempting to track defects within their existing housing management system (HMS), these methods create significant inefficiencies, leading to:

- ✗ **Lack of Visibility & Tracking:** No centralised view of reported defects, outstanding work, or contractor response times, resulting in delayed resolutions.
- ✗ **Miscommunication & Delays:** Key information is often lost in email chains or not updated in real-time, causing frustration for residents and operational bottlenecks.
- ✗ **Manual, Time-Consuming Processes:** Logging, tracking, and chasing defect resolutions require excessive administrative effort, diverting teams from more strategic tasks.
- ✗ **Limited Contractor Engagement:** Without a streamlined process, contractors often work reactively, leading to poor response times and a lack of accountability.
- ✗ **Compliance risks due to poor reporting** – Incomplete or missing records of defect resolution can lead to non-compliance with regulatory and warranty requirements.
- ✗ **Housing Management System (HMS) Limitations:** While some HMS platforms include basic repair and maintenance functions, they are not purpose-built for post-completion defect tracking and contractor collaboration tools.

The Solution

clixifix®, a purpose-built defect management SaaS solution is designed to manage defects efficiently and enhance collaboration between housing associations, contractors, and residents.

- ✓ **Real-Time Visibility:** A single source of truth for defect tracking, ensuring full transparency across teams, contractors, and stakeholders.
- ✓ **Automated Workflows:** Smart notifications, auto-reminders, and streamlined processes ensure defects are actioned and resolved faster.
- ✓ **Resident Self-Service Portal:** Allows residents to report issues, track progress, and receive updates, reducing inbound calls and emails.
- ✓ **Contractor Accountability:** Direct contractor access to assigned jobs, performance tracking, and response monitoring to improve service levels.
- ✓ **Real-time, comprehensive reporting:** Providing a clear, centralised record of all defect resolutions in line with your organisations service level agreements. Unlock valuable insights to make better informed business decisions.
- ✓ **Seamless Integration:** Allowing data to be shared seamlessly from your HMS. Whether through API, CSV, or other structured formats, clixifix® can adapt to your preferred data exchange method, making transitions effortless.

Join a thriving community of Principal Contractors improving customer care with clixifix®

After years of experience in house building and construction, we grew frustrated with the inefficiencies of the customer care systems we used.

This frustration led us to create a solution that would not only save time and money but also improve customer satisfaction. clixifix® is a purpose-built platform designed to log and manage all customer care issues, making it accessible to all stakeholders involved.

Our goal was to encourage collaboration to swiftly resolve problems with the best possible outcomes.

Today, clixifix® is trusted by many Housing Associations and Councils who are now able to save significant time, money, and effort.

"Today, clixifix® is trusted by many Principal Contractors who are now able to save significant time, money, and effort."

The powerful features we provide

Defect Management

clifix[®] is a purpose-built solution designed to streamline aftercare operations. It minimises the time your teams spend managing property defects by centralising and simplifying the process. With collaboration at its core, the platform provides complete visibility into your residents' aftercare needs, ensuring seamless communication and coordination across your supply chain.

Scheme & Plot Discussions

Centralise communication between all stakeholders in relation to non defect related queries. Publish site updates, ask questions or share any other relevant information.

Meter Readings

Record all your meter readings digitally, reducing the costs and effort associated with manual data entry, paper records, and administrative processing while improving accuracy and accessibility.

Task Management

Efficiently manage your defect operations by assigning personal tasks or creating tasks for the entire team to streamline workflows.

Digital Libraries

The clifix[®] digital libraries enable users to securely store and share essential documentation related to your new homes. They provide enhanced visibility, ensuring all relevant users have access to critical information when needed.

Comprehensive Reporting Suite

The clifix[®] real-time reporting suite empowers you to generate actionable business insights quickly, enabling more informed decision-making for the future.

Sub/Main Contractor Portal -

Provide your entire supply chain with access to a personalised portal, allowing them to submit real-time updates on the defects they are addressing. Contractors can use this free online tool to accept defect assignments, schedule repairs, and ensure timely completion of tasks.

Costs

Cost management is essential! With clifix[®], you can efficiently track and report costs related to your aftercare defects, leveraging real-time reporting for improved oversight and better decision-making.

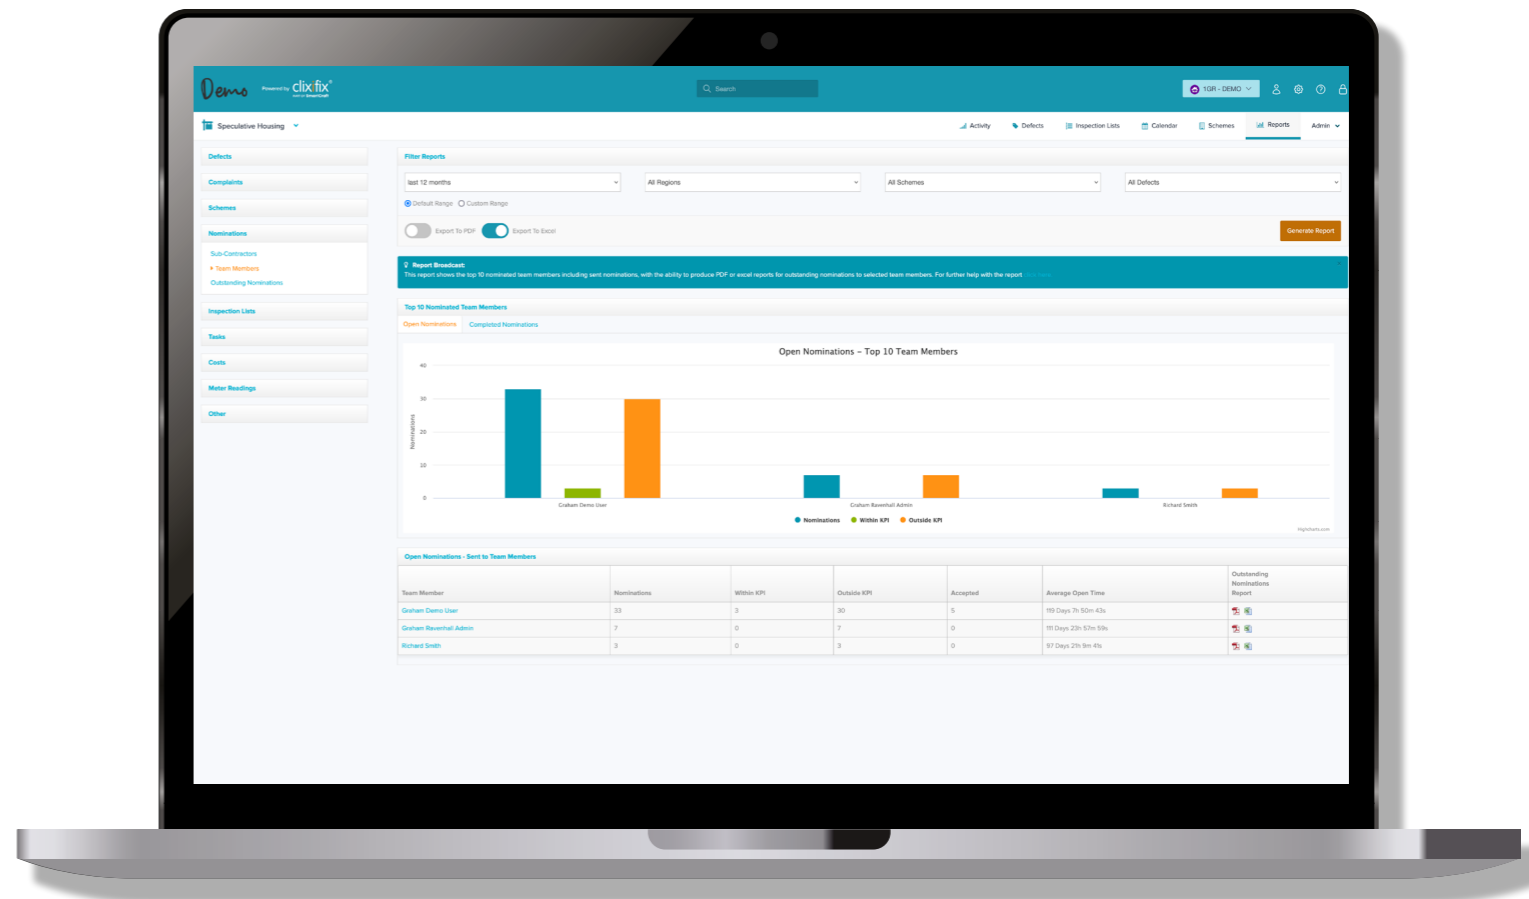

Resident Portal

With a unique login, you can give residents access to important information, keep them updated on progress and offer industry-leading customer service to your residents.

Configurable Forms

Digitise your paperwork with clifix[®]! The platform allows you to create custom forms directly within your account, enhancing your ability to capture data and manage actions more effectively.

Our Journey: Transforming Customer Care

After many years working in the house building and construction industries, nothing frustrated us more than the customer care systems we used.

After struggling with time-consuming and ineffective processes—from paper files to endless emails and clunky spreadsheets—we knew there had to be a better way. In 2012, we decided to turn these frustrations into action and began developing clixifix®.

The enterprise software available at the time was either too costly, difficult to implement, or lacked transparency. This gap in the market drove us to create a solution that would make customer

care easier, more efficient, and accessible for all businesses.

clixifix® was born with one simple goal: to make problem-solving clear and effortless. Today, hundreds of businesses across the UK are using clixifix® to save time, reduce costs, and improve customer satisfaction. Contact us today for a demo and learn how we can help simplify your customer care.
